

ELECTRIC CHAIN DRIVE GEZE E740

Chain drive suitable for daily ventilation as well as safe and effective smoke and heat extraction
The drive is suitable for installation in GEZE SHEVs according to EN 12101-2

Application range

- Bottom, top and side hung casements inward and outward opening, as well as inclined windows and light domes
- Aluminium, UPVC and timber windows

Product features

- Elegant aluminium housing in the GEZE design
- Variable stroke adjustment via swivel switch
- Low current consumption
- All mounting elements are made of metal
- Adjustment even on low casement heights
- Simple and fast frontal assembly with the help of new chain connection
- Two-piece profile finish with additional plastic guides for silent operation as well as for high enclosure rating and protection class
- Microprocessor controlled

ELECTRIC CHAIN DRIVE GEZE E740

Technical data	
Dimensions (width x height x depth)	412 x 42 x 54 mm
Operating voltage	24 V DC ($\pm 25\%$) and 230 V AC
Stroke length	400 - 300 - 200 - 100 mm variable adjustment via swivel switch
Pulling force / Pushing force	300 N / 250 N
Current consumption 24 V / 230 V	0,9 A / 0,13 A
Power consumption 24 V / 230 V	22 W / 30 W
Enclosure rating / Protection class	IP42 / III (24 V), IP42 / II (230 V)
Ambient temperature	-5° bis +75° C
Group actuation for 230 V version	up to 10 drive units
Travel speed	7 mm/s
End position cut-off enabled / disabled	electronically
Disconnection of load	electronically
Overlap compensation	electronically, 0-25 mm
Connection	2 m cable, internal connector plug
Casement width	mind. 430 mm / max. 1500 mm
Casement height	e.g. min. 400 mm (with stroke 200 mm)

Frame installation

Casement installation

ORDERING INFORMATION

Description	Finish	ID no.
Electrically operated chain drive E740 – 230V	anodised aluminium	112340
	white RAL 9016	112341
	according to RAL	112342
Electrically operated chain drive E740 – 24 V	anodised aluminium	112350
